About AllSides and AllSides for Schools
About Media Bias

Journalism is tied to a set of ethical standards and values, including truth and accuracy, fairness and impartiality, and accountability. However, journalism today often strays from objective fact; the result is biased news. Bias isn't necessarily a bad thing, but hidden media bias misleads, manipulates and divides us. This is why AllSides provides hundreds of media bias ratings, a balanced newsfeed, the AllSides Media Bias Chart™, and the AllSides Fact Check Bias Chart™.

72 percent of Americans believe traditional news sources report fake news, falsehoods, or content that is purposely misleading. With trust in media declining, media consumers must learn how to spot types of media bias.

This page outlines 12 types of media bias, along with examples of their use in popular media outlets. Don’t forget to check out the 14 types of ideological bias.
12 Types of Media Bias

1. Spin

Spin is vague, dramatic or sensational language. When journalists put a “spin” on a story, they push it away from objective, measurable facts. Spin is a form of media bias that clouds a reader’s view, preventing them from getting a precise take on what happened.

In the early 20th century, Public Relations and Advertising executives were referred to as “spin doctors.” They would use vague language and make unsupportable claims in order to promote a product, service or idea, downplaying any alternative views in order to make a sale. Increasingly, these tactics are appearing in journalism.

Examples of Spin Words and Phrases:

<table>
<thead>
<tr>
<th>Emerge</th>
<th>Serious</th>
</tr>
</thead>
<tbody>
<tr>
<td>Refuse</td>
<td>Crucial</td>
</tr>
<tr>
<td>High-stakes</td>
<td>Tirade</td>
</tr>
<tr>
<td>Landmark</td>
<td>Latest in a string of...</td>
</tr>
<tr>
<td>Major</td>
<td>Turn up the heat</td>
</tr>
<tr>
<td>Critical</td>
<td>Decrying</td>
</tr>
<tr>
<td>Offend</td>
<td>Stern talks</td>
</tr>
<tr>
<td>Wary of offending</td>
<td>Facing calls to…</td>
</tr>
<tr>
<td>Meaningful</td>
<td>Even though</td>
</tr>
<tr>
<td>Monumental</td>
<td>Significant</td>
</tr>
<tr>
<td>High-stakes</td>
<td></td>
</tr>
</tbody>
</table>

Sometimes the media uses spin words and phrase to **imply bad behavior**. These words are often used without providing hard facts, direct quotes, or witnessed behavior:
Finally
Acknowledged
Refusing to say
Dodged
Came to light

Surfaced
Emerged
Conceded
Admission
Admit to

To stir emotions, reports often include colored, dramatic, or sensational words as a substitute for the word “said.” For example:

Mocked
Raged
Bragged
Fumed
Lashed out
Raged
Incensed

Scoffed
Frustration
Erupted
Rant
Boasted
Gloated

Examples of Spin Media Bias:

President Donald Trump gloated over mass layoffs at multiple news outlets on Saturday, tweeting that "many others will follow" and attributing the loss to "Fake News."

"Fake News and bad journalism have caused a big downturn. Sadly, many others will follow. The people want the Truth!" he tweeted.

“Gloat” means “contemplate or dwell on one's own success or another's misfortune with smugness or malignant pleasure.” Is there evidence in Trump’s tweet to show he is being smug or taking pleasure in the layoffs, or is this a subjective interpretation?

Source: Business Insider
In this example of spin media bias, the Washington Post uses a variety of dramatic, sensationalist words to spin the story to make Trump appear emotional and unhinged. They also refer to the president’s “vanity” without providing supporting evidence.

Source: Washington Post

2. Unsubstantiated Claims

Journalists sometimes make claims in their reporting without including evidence to back them up. This can occur in the headline of an article, or in the body.

Statements that appear to be fact, but do not include specific evidence, are a key indication of this type of media bias.
Examples of Unsubstantiated Claims Media Bias

Socialist Rep. Alexandria Ocasio-Cortez (D-NY) continued her longstanding pattern of not understanding how things work on Thursday, this time indicating that she does not know the difference between a media company and a political party.

In this media bias instance, The Daily Wire references a "longstanding pattern," but does not back this up with evidence.

Source: The Daily Wire

Sen. Kamala Harris (D-Calif.) condemned the violent attack on actor Jussie Smollett, calling it “an attempted modern day lynching.”

“[Smollett] is one of the kindest, most gentle human beings I know. I’m praying for his quick recovery,” the 2020 presidential candidate tweeted.

“This was an attempted modern day lynching. No one should have to fear for their life because of their sexuality or color of their skin. We must confront this hate.”

In late January 2019, actor Jussie Smollett claimed he was attacked by two men who hurled racial and homophobic slurs. The Hill refers to “the violent attack” without using the word “alleged” or “allegations.” The incident was revealed to be a hoax created by Smollett himself.

Source: The Hill

First, Sanders’s complaint isn’t that millionaires exist per se. After all, if America’s household wealth were distributed evenly across the population, then every family of four would have a net worth of $1.2 million. Sanders’s critique is that the United States’ super-rich are symptomatic of a system that churns out a small class of extremely wealthy people who rule over the vast remainder. Key

This Washington Post columnist makes a claim about wealth distribution without noting where it came from. Who determined this number and how? Source: Washington Post
3. Opinion Statements Presented as Facts

Sometimes journalists use subjective language or statements under the guise of reporting objectively. Even when a media outlet presents an article as a factual, hard news piece, it may employ subjective statements or language.

A subjective statement is one that is based on personal opinions, assumptions, beliefs, tastes, preferences, or interpretations. It reflects how the writer views reality, what they presuppose to be the truth. It is a statement colored by their specific perspective or lens and cannot be verified using concrete facts and figures within the article.

There are objective modifiers — “blue” “old” “single-handedly” “statistically” “domestic” — for which the meaning can be verified. On the other hand, there are subjective modifiers — “suspicious,” “dangerous,” “extreme,” “dismissively,” “apparently” — which are a matter of interpretation.

Interpretation can present the same events as two very different incidents. A political protest in some people sat down in the middle of a street blocking traffic to draw attention to their cause can be described as “peaceful” and “productive,” or, others may describe it as “aggressive” and “disruptive.”

Words that signal subjective statements include:

<table>
<thead>
<tr>
<th>Good/better/best</th>
<th>Extreme</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bad/worse/worst</td>
<td>Suggests</td>
</tr>
<tr>
<td>Is considered to be</td>
<td>May mean that</td>
</tr>
<tr>
<td>It’s likely that</td>
<td>Would seem</td>
</tr>
<tr>
<td>Seemingly</td>
<td>Could</td>
</tr>
<tr>
<td>Dangerous</td>
<td>Possibly</td>
</tr>
<tr>
<td></td>
<td>Apparently</td>
</tr>
</tbody>
</table>

Source: Butte College Critical Thinking Tipsheet
An objective statement, on the other hand, is an observation of **observable facts**. It is not based on emotions or personal opinion and is based on empirical evidence — what is quantifiable and measurable.

It’s important to note that an objective statement may not actually be *true*. The following statements are objective statements, but can be verified as true or false:

*Taipei 101 is the world's tallest building.*

*Five plus four equals ten.*

*There are nine planets in our solar system.*

Now, the first statement of fact is true (as of this writing); the other two are false. It is possible to verify the height of buildings and determine that Taipei 101 tops them all. It is possible to devise an experiment to demonstrate that five plus four does *not* equal ten or to use established criteria to determine whether Pluto is a planet.

*Source: Butte College Critical Thinking Tipsheet*

Editorial reviews by AllSides found that some media outlets blur the line between subjective statements and objective statements, leading to potential confusion for readers, in two key ways:

- Including subjective statements in their writing and not attributing them to a source. (see Omission of Source Attribution, page 16)
- Placing opinion or editorial content on the homepage next to hard news, or otherwise not clearly marking opinion content as “opinion.”

**Examples of Opinion Statements Presented as Fact**

*Vox*

**The EPA is lifting greenhouse gas limits on coal power plants**

The latest proposal won’t stop the steady decline of the coal industry.
The sub-headline Vox uses is an opinion statement — some people likely believe the lifting of the gas limit will strengthen the coal industry — but Vox included this statement in a piece not labeled “Opinion.”
Source: Vox

In this article about Hillary Clinton’s appearance on "The Late Show With Stephen Colbert," the author makes an assumption about Clinton’s motives and jumps to a subjective conclusion.
Source: Fox News

4. Sensationalism/Emotionalism

Sensationalism is the presentation of information in a way that gives a shock or makes a deep impression. Often it gives readers a false sense of culmination, that all previous reporting has led to this ultimate story.

Sensationalist language is often dramatic, yet vague. It often involves hyperbole — at the expense of accuracy — or warping reality to mislead or provoke a strong reaction in the reader.

In recent years, some media outlets have been criticised for overusing the term “breaking” or “breaking news,” which historically was reserved for stories of deep impact or wide-scale importance.
Many reporters increase the readability of their pieces using vivid verbs. But there are many verbs that are heavy with implications that can’t be objectively corroborated: “blast” “slam” “bury” “abuse” “destroy” “worry.”

**Words and phrases that signal sensationalism/emotionalism include:**

<table>
<thead>
<tr>
<th>Shocking</th>
<th>Warning</th>
</tr>
</thead>
<tbody>
<tr>
<td>Explosive</td>
<td>Lashed out</td>
</tr>
<tr>
<td>Remarkable</td>
<td>Embroiled in...</td>
</tr>
<tr>
<td>Slams</td>
<td>Onslaught</td>
</tr>
<tr>
<td>Rips</td>
<td>Torrent of tweets</td>
</tr>
<tr>
<td>Forcing</td>
<td>Scathing</td>
</tr>
<tr>
<td>Chaotic</td>
<td>Desperate</td>
</tr>
<tr>
<td></td>
<td>Showdown</td>
</tr>
</tbody>
</table>

**Examples of Sensationalism/Emotionalism Media Bias**

*GOYANG, South Korea (AP) — There will be plenty to gawk at Friday when North Korean leader Kim Jong Un walks south across the world’s most heavily armed border and stands face-to-face with South Korean President Moon Jae-in. Two men who seemed on the verge of war months ago will take a pleasant walk, plant a commemorative tree, inspect an honor guard and belly-up to a lavish banquet.*

“Gawk” means to stare open and stupidly. Does AP’s language treat this event as serious and diplomatic, or as entertainment?

*Source: AP*

*The skinny version: There are more than a hundred Republican-held congressional districts across the country that have a narrower margin than 17. If seats that look like this one in Pennsylvania are toss-ups in November, it’s going to be a bloodbath.*
Here, BBC uses sensationalism in the form of hyperbole, as the election is unlikely to involve bloodshed in the literal sense. **Source: BBC**

In this piece from the New York Post, the author uses multiple sensationalist phrases and emotional language to dramatize the “Twitter battle” it is describing. **Source: New York Post**

5. Mudslinging/Ad Hominem

Mudslinging is a type of media bias when unfair or insulting things are said about someone in order to damage their reputation. Similarly, ad hominem (Latin for “to the person”) attacks are attacks on a person’s motive or character traits instead of the content of their argument or idea. Ad hominem attacks can be used overtly, or as a way to subtly discredit someone without having to engage with their argument.
Examples of Mudslinging

Bret Stephens Is Not a Bedbug. He's a Delicate Snowflake.

The *New York Times* columnist emailed a professor to complain about a mean tweet—and cc’ed the provost.

A *Reason* editor calls a *New York Times* columnist a "snowflake" after the columnist emailed a professor and his provost to complain about a tweet calling him a bedbug.

Source: *Reason*

In March 2019, *The Economist* ran a piece describing political commentator and author Ben Shapiro as “alt-right.” Readers pointed out that Shapiro is Jewish (the alt-right is largely anti-Semitic) and has condemned the alt-right. *The Economist* issued a retraction and instead
referred to Shapiro as a “radical conservative.”
Source: Twitter

6. Mind Reading

Mind reading occurs in journalism when a writer assumes they know what another person thinks, or thinks that the way they see the world reflects the way the world really is.

Examples of Mind Reading

(CNN) — Donald Trump’s hatred of looking foolish and Democrats’ conviction that they have a winning hand is leaving the President with no way out of the stalemate over his border wall.

We can’t objectively measure that Trump hates looking foolish, because we can’t read his mind or know what he is feeling. There is also no evidence provided to demonstrate that Democrats believe they have a winning hand.
Source: CNN

NATIONAL REVIEW

Criticizing the president the other day, Joe Scarborough nonetheless conceded, “Presidents are always working, whether on a golf course or behind a desk.” But is that actually so? What, exactly, does President Obama do? He seems to learn everything from the papers — from the IRS scandal to the VA scandal to the mobilization of the Missouri National Guard. International events routinely take him by surprise. His professional activities include fundraising — 40 events this year so far — and perfunctory addresses to the public. He goes through the presidential motions: meeting with officials and foreign dignitaries, holding press conferences, sitting for interviews, shipping MREs to endangered populations, ordering air strikes. But there is no passion behind these activities, no restless energy, no managerial competence, no sense of purpose or mission or strategy, none of the qualities associated with leadership in business, politics, and culture.
How do we know that Obama doesn’t have passion or sense of purpose? Here, the National Review writer assumes they know what is going on in Obama’s head.
Source: National Review

Vox

One of the most pertinent moments in Neeson’s follow-up interview with Roberts came when he confidently asserted that “this was 40 years ago” and stated that he isn’t racist.

Despite Neeson also saying that he worked to get rid of his racist feelings, his reminder that decades have passed since this incident might be interpreted as a declaration that racism and bias are problems that go away with time. If that were true, racism wouldn’t exist today.

Vox is upfront about the fact that they are interpreting what Neeson said, yet this interpretation ran in a piece labeled objective news — not a piece in the Opinion section. Despite being overt about interpreting, by drifting away from what Neeson actually said, Vox is mind reading.
Source: Vox

7. Slant

Slant occurs when journalists tell only part of a story. It can include cherry-picking information or data to support one side. Slant prevents readers from getting the full story, and narrows the scope of our understanding.

Examples of Slant

Ocasio-Cortez has been portrayed as one of the leaders of the progressive wing in the Democratic Party. She, along with Sanders, has received intense criticism for policy proposals like the “Green New Deal.”
In the above example, Fox News notes that Rep. Alexandria Ocasio-Cortez’s policy proposals have received “intense criticism.” While this is true, it is only one side of the picture, as the Green New Deal was well received by other groups. Source: Fox News

8. Flawed Logic

Flawed logic or faulty reasoning is a way to misrepresent people’s opinions or to arrive at conclusions that are not justified by the given evidence. Flawed logic can involve jumping to conclusions or arriving at a conclusion that doesn’t follow from the premise.

Examples of Flawed Logic

Two-time failed Democratic presidential candidate Hillary Clinton snubbed Melania Trump during George H.W. Bush’s funeral on Wednesday, refusing to shake her hand or wave at the First Lady after the other former presidents and their wives did.

Melania shook hands with former President Barack Obama, Michelle Obama, and former President Bill Clinton as she then waved in the direction of Hillary and former President Jimmy Carter – only to receive a wave back from Carter and an awkward and bitter nod back from Hillary.

Here, the Daily Wire interprets a video to draw conclusions that aren’t clearly supported by the available evidence. The video shows Melania did not extend her hand to shake, but it could be because Clinton was too far away to reach, or perhaps there was no particular reason at all. By jumping to conclusions that this amounted to a “snub” or was the result of “bitterness” instead of limitations of physical reality or some other reason, The Daily Wire is engaging in flawed logic.

Source: The Daily Wire
9. Bias by Omission

Bias by omission is a type of media bias in which media outlets choose not to cover certain stories, omit information that would support an alternative viewpoint, or omit voices and perspectives on the other side.

Media outlets sometimes omit stories in order to serve a political agenda. Sometimes, a story will only be covered by media outlets on a certain side of the political spectrum. Bias by omission also occurs when a reporter does not interview both sides of a story — for instance, interviewing only supporters of a bill, and not including perspectives against it.

Examples of Bias by Omission

In a piece titled, "Hate crimes are rising, regardless of Jussie Smollett’s case. Here’s why," CNN claims that hate crime incidents rose for three years, but omits information that may lead the reader to different conclusions. According to the FBI’s website, reports of hate crime incidents rose from previous years, but so did the number of agencies reporting, “with approximately 1,000 additional agencies contributing information.” This makes it unclear as to whether hate crimes are actually on the rise, as the headline claims, or simply appear to be because more agencies are reporting.

Source: CNN
10. Omission of Source Attribution

An informative, balanced article should provide the background or context of a story, including naming sources (publishing “on-the-record” information).

Sometimes, reporters will mention “immigration opponents” or “supporters of the bill” without identifying who these sources are.

It is sometimes useful or necessary to use unnamed sources, because insider information is only available if the reporter agrees to keep their identity secret. But responsible journalists should be aware and make it clear that they are offering second-hand information on sensitive matters. This fact doesn’t necessarily make the statements false, but it does make them less than reliable.

Examples of Omission of Source Attribution

In this paragraph, the Epoch Times repeatedly states "critics say" without attributing the views to anyone specific.

Source: The Epoch Times
In a piece about the Mueller investigation, The New York Times never names the investigators, officials or associates mentioned. Source: The New York Times

Story and viewpoint placement can reveal media bias by showing which stories or viewpoints the editor finds most important.

Bias by story choice

This is when a media outlet's bias is revealed by which stories the outlet chooses to cover or to omit. For example, an outlet that chooses to cover the topic of climate change frequently can reveal a different political leaning than an outlet that chooses to cover stories about gun laws. The implication is that the outlet's editors and writers find certain topics more notable, meaningful, or important than others, which can tune us into the outlet's political bias or partisan agenda. Bias by story choice is closely linked to media bias by omission and slant.

Bias by story placement

The stories that a media outlet features "above the fold" or prominently on its homepage and in print show which stories they really want you to read, even if you read nothing else on the site or in the publication. Many people will quickly scan a homepage or read only a headline, so the stories that are featured first can reveal what the editor hopes you take away or keep top of mind from that day.
Bias by viewpoint placement

This can often be seen in political stories. A balanced piece of journalism will include perspectives from both the left and the right in equal measure. If a story only features viewpoints from left-leaning sources and commentators, or includes them near the top of the story/in the first few paragraphs, and does not include right-leaning viewpoints, or buries them at the end of a story, this is an example of bias by viewpoint.

Examples of Bias by Story Choice and Placement

In this screenshot of ThinkProgress' homepage taken at 1 p.m. EST on Sept. 6, 2019, the media outlet chooses to prominently display coverage of LGBT issues and cuts to welfare and schools programs. In the next screenshot of The Epoch Times homepage taken at the same time on the same day, the outlet privileges very different stories.

(Continued on next page)
Taken at the same time on the same day as the screenshot above, The Epoch Times chooses to prominently feature stories about a hurricane, the arrest of illegal immigrants, Hong Kong activists, and the building of the border wall. Notice that ThinkProgress’ headline on the border wall focuses on diverting funds from schools and daycares, while the Epoch Times headline focuses on the wall’s completion.
12. Subjective Qualifying Adjectives

Journalists can reveal bias when they include subjective, qualifying adjectives in front of specific words or phrases. Qualifying adjectives are words that characterize or attribute specific properties to a noun. When a journalist uses qualifying adjectives, they are suggesting a way for you to think about or interpret the issue, instead of just giving you the facts and letting you make judgements for yourself. This can manipulate your view. Subjective qualifiers are closely related to spin words and phrases, because they obscure the objective truth and insert subjectivity.

For example, a journalist who writes that a politician made a "serious allegation" is interpreting the weight of that allegation for you. An unbiased piece of writing would simply tell you what the allegation is, and allow you to make your own judgement call as to whether it is serious or not.

In opinion pieces, subjective adjectives are okay; they become a problem when they are inserted outside of the opinion pages and into hard news pieces.

Sometimes, the use of an adjective may be warranted, but journalists have to be careful in exercising their judgement. For instance, it may be warranted to call a Supreme Court ruling that overturned a major law a "landmark case." But often, adjectives are included in ways that not everyone may agree with; for instance, people who are in favor of limiting abortion would likely not agree with a journalist who characterizes new laws restricting the act as a "disturbing trend." Therefore, it's important to be aware of subjective qualifiers and adjectives so that you can be on alert and then decide for yourself whether it should be accepted or not. It is important to notice, question and challenge adjectives that journalists use.

### Examples of Subjective Qualifying Adjectives

<table>
<thead>
<tr>
<th>disturbing rise</th>
<th>extreme law</th>
<th>awkward flaw</th>
</tr>
</thead>
<tbody>
<tr>
<td>serious accusations</td>
<td>baseless claim</td>
<td>offensive statement</td>
</tr>
<tr>
<td>troubling trend</td>
<td>debunked theory (this phrase could coincide with bias by omission, if the journalist doesn't include information for you to determine why the theory is false.)</td>
<td>harsh rebuke</td>
</tr>
<tr>
<td>sharp rise</td>
<td></td>
<td>extremist group</td>
</tr>
<tr>
<td>sinister warning</td>
<td></td>
<td>far-right/far-left organization</td>
</tr>
<tr>
<td>critical bill</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
HuffPost's headline includes the phrases "sinister warning" and "extremist Republican." It goes on to note the politician's "wild rant" in a "frothy interview" and calls a competing network "far-right." These qualifying adjectives encourage the reader to think a certain way. A more neutral piece would have told the reader what Cawthorn said without telling the reader how to interpret it.

Some Final Notes on Bias

**Everyone is biased.** It is part of human nature to have perspectives, preferences, prejudices, leanings, and partialities. But sometimes, bias — especially media bias — can become invisible to us. This is why AllSides provides hundreds of media bias ratings and a media bias chart.

We are all biased toward things that show us in the right. We are biased toward
information that confirms our existing beliefs. We are biased toward the people or information that supports us, makes us look good, and affirms our judgements and virtues. And we are biased toward the more moral choice of action — at least, that which seems moral to us.

Journalism as a profession is biased toward vibrant communication, timeliness, and providing audiences with a sense of the current moment — whether or not that sense is politically slanted. Editors are biased toward strong narrative, stunning photographs, pithy quotes, and powerful prose. Every aspiring journalist has encountered media bias — sometimes the hard way. If they stay in the profession, often it will be because they have incorporated the biases of their editor.

**But sometimes, bias can manipulate and blind us. It can put important information and perspectives in the shadows and prevent us from getting the whole view.** For this reason, there is not a single type of media bias that can’t, and shouldn’t occasionally, be isolated and examined. This is just as true for journalists as it is for their audiences.

Good reporting can shed valuable light on our biases — good and bad. By learning how to spot media bias, how it works, and how it might blind us, we can avoid being fooled by media bias and fake news. We can learn to identify and appreciate different perspectives — and ultimately, come to a more wholesome view.

About AllSides and AllSides for Schools

AllSides strengthens our democracy with balanced news, diverse perspectives, and real conversation.

We expose people to information and ideas from all sides of the political spectrum so they can better understand the world — and each other. Our balanced news coverage, media bias ratings, civil dialogue opportunities, and technology platform are available for everyone and can be integrated by schools, nonprofits, media companies, and more.

Our mission is to free people from filter bubbles so they can better understand the world — and each other.

**AllSides for Schools** prepares students for thoughtful participation in democracy — and in life. AllSides for Schools improves our democracy by helping students from middle school through college and beyond learn news literacy, civil dialogue, and life skills. Visit [AllSides.com](http://AllSides.com) and [AllSidesforSchools.org](http://AllSidesforSchools.org) to learn more.
