Overview

An AllSides analysis of NewsBreak found that NewsBreak has a Lean Left bias. NewsBreak displayed far more articles with a AllSides Media Bias Rating™ of Lean Left than those with a Center, Lean Right or Right rating in its [“National News” section](#).

Overall, the bias of the top news sources that appeared on Newsbreak over a three-week period were 0% Left-rated, 80% Lean Left-rated, 10% Center-rated, 0% Lean Right-rated, 8% Right-rated, and 2% not rated by AllSides.

AllSides Media Bias Ratings™ of Sources Curated on NewsBreak National News

Percentage of articles, out of 210, attributed to a source and its rating based on AllSides Media Bias Ratings™. Content collected between September 7 – September 27, 2023.

Fox News was the only Right-rated outlet Newsbreak displayed. No outlets that were Left-rated or Lean Right-rated were displayed.

Top News Sources Curated Sources Curated on NewsBreak National News

Percentage of articles, out of 210, attributed to a source and its rating based on AllSides Media Bias Ratings™. Content collected between September 7 – September 27, 2023.

The analysis resulted in AllSides issuing a Lean Left AllSides Media Bias Rating™ for NewsBreak.

For this analysis, AllSides looked only at headlines that appeared under the “[National News](#)” section of Newsbreak.com. NewsBreak [bills itself](#) as “the nation’s leading local news app” and its homepage shows news by zipcode; users can also [select a state or city](#). For the purposes of this analysis, AllSides looked only at non-customizable, non-local content in NewsBreak’s National News section.

The 2023 AllSides NewsBreak Bias Analysis was conducted during the three-week period from September 7 – September 27 and analyzed 210 total articles. The analysis involved cross-referencing articles curated on NewsBreak with the AllSides Media Bias Rating™ for each source. AllSides Media Bias Ratings™ are determined by multiple methodologies that ensure ratings reflect the average judgment of all Americans. The ratings are driven by a balance of input from experts and average Americans across the nation and across the political spectrum.

This report provides details about the NewsBreak bias analysis methodology, results, and how AllSides avoided bias on the part of the researchers.

Note that this analysis does not investigate whether the political leanings or biases displayed by Newsbreak are intentional. While it is possible that the political leanings are overtly or covertly intentional, it is also possible they are accidental. These leanings could be a fair reflection of content available online, the partnerships Newsbreak has with publishers, perspectives of the average online user, or the greater effectiveness one political side has in promoting its perspectives online. Whether NewsBreak should provide a broader or more balanced diversity of perspectives, and whether that would support or hinder a healthier democratic society, is a philosophical or ethical question beyond the bounds of this analysis.

In-Depth Findings

The AllSides analysis found NewsBreak curated sources on the left far more than sources on the right.

AllSides Media Bias Ratings™ of Sources Curated on NewsBreak “National News” Section

Percentage of articles, out of 210, attributed to a source and its rating based on AllSides Media Bias Ratings™. Content collected between September 7 – September 27, 2023.

Sources Curated on NewsBreak

Out of 210 total articles analyzed from NewsBreak’s “[Headlines](#)” section, the five news sources that appeared most often were [ABC News \(Lean Left\)](#), [Associated Press \(Lean Left\)](#), [CBS News \(Lean Left\)](#), [NBC News \(Lean Left\)](#), and [Fox News \(Right\)](#). No Left-rated or Lean

Right-rated sources appeared on NewsBreak throughout the analysis. The only Right-rated source to appear was Fox News.

Top News Sources Curated Sources Curated on NewsBreak National News

Percentage of articles, out of 210, attributed to a source and its rating based on AllSides Media Bias Ratings™. Content collected between September 7 – September 27, 2023.

Background on NewsBreak

NewsBreak is largely known for its mobile application, which allows users to view local news. It is also available on desktop (via its [website](#)), tablets, and has a daily newsletter. News is aggregated, so users can view stories from various sources.

The news source aligns itself with six principles: accuracy, transparency, accountability, safety, and fairness. On its [Community Standards page](#), it describes its commitment to fairness: “NewsBreak believes in highlighting diverse voices, stories, opinions, and sources. We favor work that presents all relevant sides of a story and provides all necessary context. It is equally important that our contributors and partners do not draw false moral equivalencies where none exist... Excessive bias that distorts or misrepresents is not allowed.”

NewsBreak aggregates a wide variety of topics, including politics, sports, technology, weather, local traffic, and much more. Users can save topics they’re most interested in and articles they want to read later.

The company was founded in 2015, and is highly customizable by users. The [About page](#) reads, “Newsbreak’s cutting-edge personalization technology responds to your choices and reading habits in the app and tails itself to suit your tastes.”

Purpose & Methodology

For this bias analysis, AllSides determined the political bias of NewsBreak based on the headlines that appeared under the “[National News](#)” section of Newsbreak.com. Newsbreak [bills itself](#) as “the nation’s leading local news app” and its homepage shows news by zipcode; users can also [select a state or city](#). For the purposes of this analysis, AllSides looked only at non-customizable, non-local content in Newsbreak’s National News section.

While the news source primarily focuses on local content, it does highlight national headlines as well, which are curated and not user-customizable. Users can block an entire news source, which would prevent it from appearing on Newsbreak at all. For the purposes of this analysis, AllSides only looked at national news headlines *without* customizing the experience. AllSides determined that content in Newsbreak’s National News section was not customized by location by having users from different parts of the country check this section of the website at the same time; they all saw the same content.

Content Collection

In the analysis, AllSides collected the top 10 stories that appeared in NewsBreak’s “Headlines” section on the homepage once per day over the course of three weeks, from September 7 – September 27, 2023.

How AllSides Made This Analysis as Objective as Possible

AllSides only took the bias of the overall media outlet into account – not the content of the article itself. For example, any article curated from [The New York Times \(Lean Left\)](#) was considered Lean Left, reflecting the outlet's overall AllSides Media Bias Rating at the time of the analysis. AllSides Media Bias Ratings™ reflect the average judgment of people across the political spectrum, not one individual or group. AllSides' media bias rating methodology is based on multiple methods, including Blind Bias Surveys of Americans across the political spectrum and expert panel reviews by a multipartisan group. This prevents one elite group or individual from having a disproportionate impact on the ratings.

About AllSides™

AllSides™ is a media solutions company that strengthens our democratic society with [balanced news](#), [media bias ratings](#), [diverse perspectives](#), and [real conversation](#).

AllSides' balanced newsfeed provides news from the left, center, and right and is powered by over 1,400 AllSides Media Bias Ratings™ that reveal the average judgment of Americans, not one elite group. AllSides serves news consumers at AllSides.com and provides patented technologies, tools and services — including media bias audits — to media companies, nonprofits, businesses and other organizations. Visit [AllSides.com/services](#).

AllSides provides a platform for a diverse range of perspectives on current events and political issues. This includes presenting news and analysis from multiple viewpoints, including those that may not be represented in mainstream media. AllSides aims to foster greater understanding and dialogue by providing a space where people can learn about and engage with perspectives that differ from their own.

AllSides' mission is to free people from filter bubbles so they can better understand the world — and each other. AllSides [employs](#) a multipartisan team of editors who review and curate news articles from a variety of sources. The articles are then presented side-by-side in a balanced newsfeed that reveals the political perspective of the source.

Since 2012, AllSides has been analyzing the media bias of news outlets using its patented and proprietary systems, providing over 1,400 [media bias ratings](#) for news sources, writers, fact-check organizations, and think tanks. AllSides believes everyone is biased, and that's okay. But hidden bias can manipulate, mislead, and divide us.

AllSides provides Media Bias Audits to news companies interested in discovering their bias and providing more objective, balanced news. Its patented and proprietary system reveals how average Americans perceive the political bias of news reporting, and its multipartisan panel provides recommendations for achieving more balanced news.

In addition to providing news and analysis, AllSides also offers tools and resources for individuals, schools, and organizations interested in promoting media literacy and understanding. This includes the [AllSides Media Bias Chart™](#), [AllSides for Schools](#), [Red Blue Translator](#), and other [tools](#) and [services](#).

About AllSides Media Bias Ratings™

AllSides empowers you to understand the role media bias plays in the news and information you consume. [AllSides Media Bias Ratings™](#) and the [AllSides Media Bias Chart™](#) help make news bias transparent, allowing you to easily identify different perspectives and political leanings so you can get the full picture and think for yourself.

AllSides Media Bias Ratings™ are based on a scientific, multipartisan analysis, and are meant to reflect the average view of the American public. In other words, they are meant to reflect the average view of people across the political spectrum, not one individual or group.

AllSides believes there is no such thing as [unbiased news](#), and that concealed bias can mislead and divide us. The best approach is to acknowledge and balance this bias, so that people can consider multiple viewpoints and gain a more comprehensive understanding of the world around them.

AllSides assigns a rating of [Left](#), [Lean Left](#), [Center](#), [Lean Right](#), or [Right](#) to each media outlet or writer, as well as a numerical rating using the [AllSides Media Bias Meter™](#), which provides more nuance in each category.

The AllSides patented bias detection and display technology is powered by a combination of the ‘wisdom-of-the-crowd’ technology and statistical research and methodologies. The system utilizes multiple methods for calculating media bias, and combines them for the best results. For each source, the methodology may include:

- **Blind Bias Surveys** — A survey that asks respondents to rate the media bias of a news outlet on a left-right scale without knowing the news source or author they are reviewing. AllSides normalizes these data based on respondent ideology to ensure that the audience reflects the social and political diversity of the nation.
- **Editorial Reviews** — A multipartisan panel conducts in-depth reviews of a media outlet. The Editorial Review Panel includes people from across the political spectrum. During this process, each reviewer independently evaluates and suggests a rating for the source. Then, the group discusses individual findings, shares impressions, and comes to an agreement on the result.
- **Third Party Data** — When available and relevant, data that is conducted by a transparent, credible source may inform AllSides Media Bias Ratings™. AllSides always notes which third-party analyses it has taken to account on the source page for any outlet.
- **Community Feedback** — Visitors to AllSides.com can vote on the rating for any outlet. This feedback does not determine our ratings, but may trigger a deeper review.
- **Independent Reviews** — An AllSides reviewer assesses content and comes to a general conclusion on a source’s bias. This is AllSides’ lowest level of analysis, usually undertaken to give initial, low-confidence ratings.

For more information about how AllSides rated media bias, visit its [media bias rating methods page](#).
