# Overview

An AllSides analysis of [Bing News](#) in September 2025 found that it displayed more sources with an AllSides Media Bias Rating™ on the left than the center or right.

Of 177 articles evaluated over a two-week period, **72% were from outlets on the left (15% Left, 56% Lean Left), 22% from Center-rated outlets, and 5% from outlets on the right (3% Right, 1% Lean Right).** Two percent of articles evaluated were from outlets not rated by AllSides.

## AllSides Media Bias Ratings™ of Prevalent News Sources Curated on Bing News

*Percentage of articles, out of 177, attributed to a source and its rating based on AllSides Media Bias Ratings™. Content collected between September 9–21, 2025. See report for details.*

**Note:** Percentages are rounded to whole numbers; totals may not sum exactly due to rounding.

The analysis looked explicitly at Bing News' "Top Stories" and "U.S. News" sections, which are not personalized for individual users.

The results of the September 2025 AllSides Bing News Analysis were quite consistent with AllSides' comparative [2023 analysis](#).

The analysis, conducted from September 9–21, 2025, cross-referenced articles curated on Bing News with the [AllSides Media Bias Rating™](#) for each source. [AllSides Media Bias Ratings™](#) are determined by a methodology that reflects the average judgment of all Americans.

[Associated Press \(Left bias\)](#), [USA Today \(Lean Left bias\)](#), and [Washington Post \(Lean Left bias\)](#) were the most commonly curated sources.

Note that this analysis does not investigate whether the political leanings or biases displayed by Bing News are intentional. Whether Bing News should provide a broader or more balanced diversity of perspectives, and whether that would support or hinder a healthier democratic society, is a philosophical or ethical question beyond the bounds of this analysis, which is descriptive only.

# Purpose & Methodology

AllSides conducted this media bias analysis of Bing News to determine the political bias of the aggregator based on the media outlets it curates.

## Content Collection

AllSides collected the top stories displayed on Bing News over the course of a two-week period from September 9–21, 2025, during the 10:00am ET hour each day. This consisted of pulling from the “Top Stories” and “U.S. News” sections of the website.

Because the “Top Stories” and “U.S. News” sections are unaffected by algorithms or personalization, these were the two sections AllSides chose to analyze for this report.

## How AllSides Made This Analysis as Objective as Possible

In an effort to be as objective as possible in the analysis, **AllSides only took the bias of the media outlet into account — not the content of the article itself.** For example, any article curated from The Wall Street Journal News was considered Center, reflecting the outlet’s overall AllSides Media Bias Rating at the time of the analysis. AllSides Media Bias Ratings reflect the average view of people across the political spectrum, not one individual or group. AllSides’ media bias rating methodology is based on Blind Bias Surveys of Americans across the political spectrum and expert panel reviews by a multipartisan group, preventing one elite group or individual from having a disproportionate impact on the ratings.

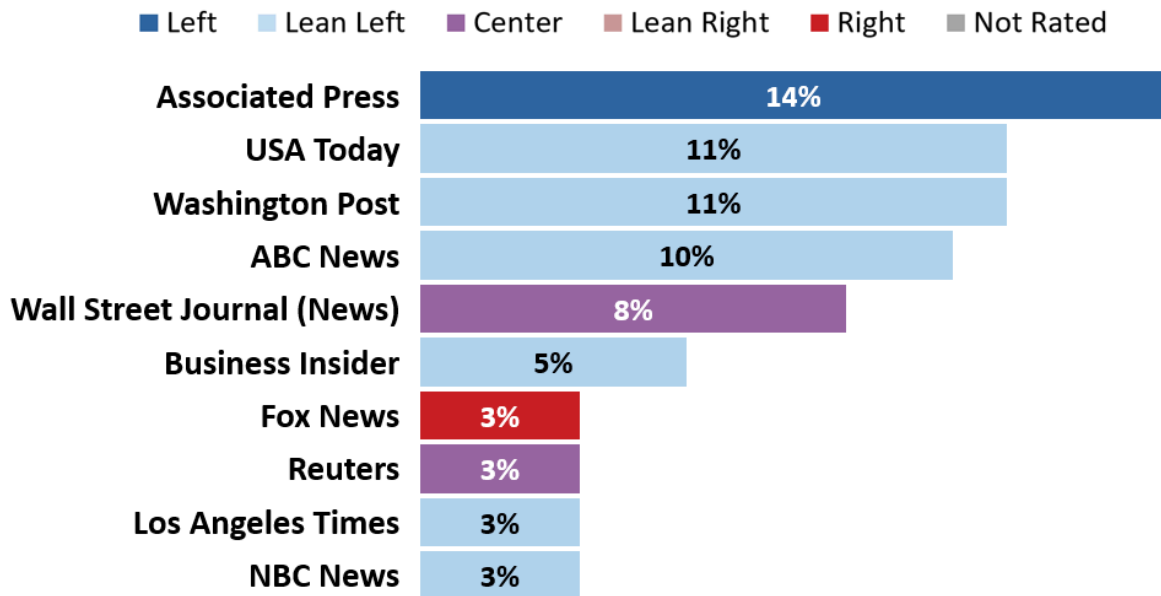

# In-Depth Findings

The AllSides analysis found that Bing News more often curated news articles from outlets on the left than outlets on the right.

## Top Outlets Curated

Of the 177 total articles analyzed, the top five sources appearing the most often were [Associated Press \(Left bias\)](#), [USA Today \(Lean Left bias\)](#), [Washington Post \(Lean Left bias\)](#), [ABC News \(Lean Left bias\)](#), and [Wall Street Journal News \(Center bias\)](#).

## Prevalent News Sources Curated on Bing News with Corresponding AllSides Media Bias Rating™

*Percentage of articles, out of 177, attributed to a source and its rating based on AllSides Media Bias Ratings™. Content collected between September 9–21, 2025. See report for details.*

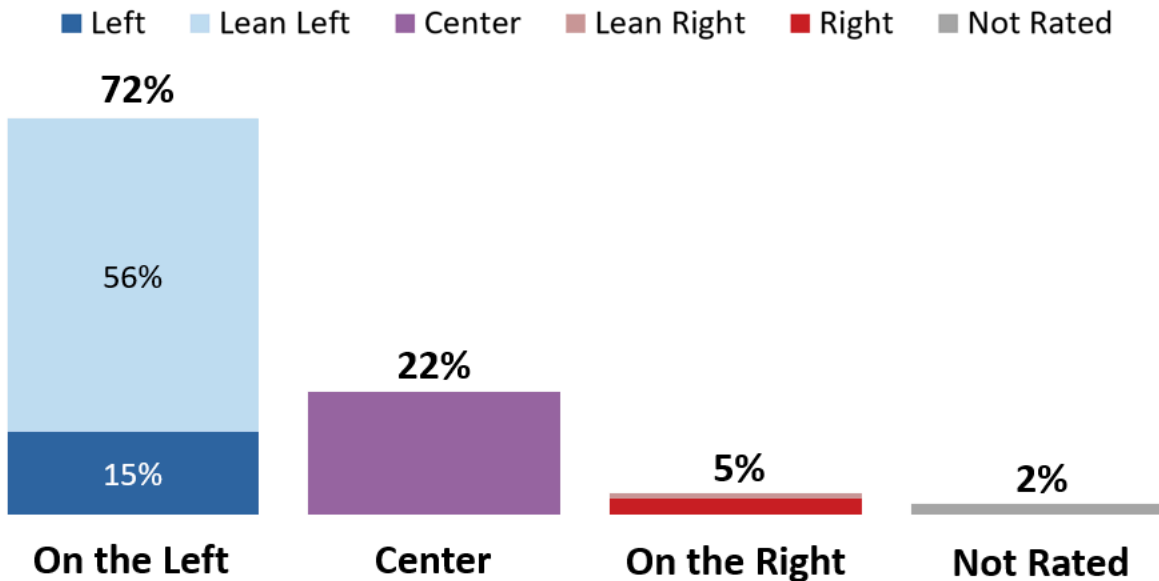

Of all outlets curated in the analysis — of which there were 38 — two were from the right: [Fox News \(Right bias\)](#) and [Washington Examiner \(Lean Right bias\)](#).

## Bias of Outlets Curated

Of all 177 articles analyzed, 72% were from outlets on the left (15% Left, 56% Lean Left), 22% from Center-rated outlets, and 5% from outlets on the right (3% Right, 1% Lean Right). Two percent of articles were from outlets not rated by AllSides.

### AllSides Media Bias Ratings™ of Prevalent News Sources Curated on Bing News

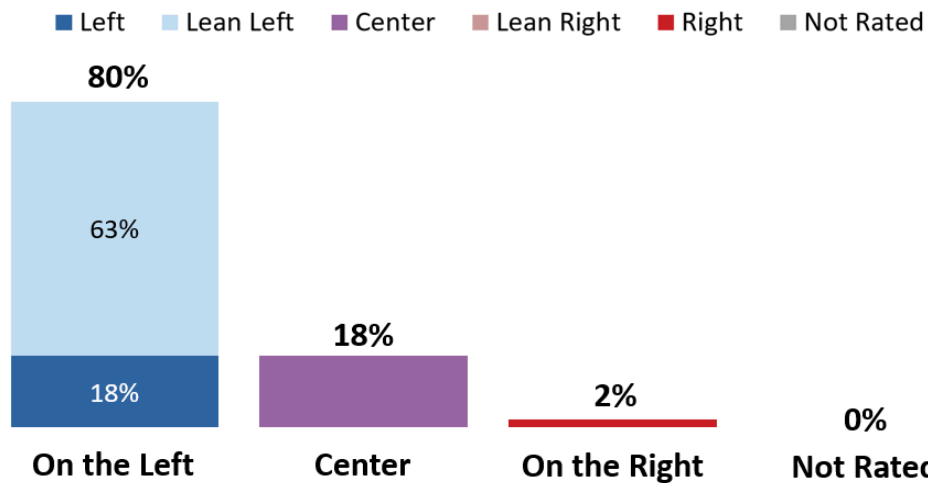

Percentage of articles, out of 177, attributed to a source and its rating based on AllSides Media Bias Ratings™. Content collected between September 9–21, 2025. See report for details.

## “Top Stories” Section

Bing News’ “Top Stories” section is selected by its editors and is unaffected by personalization. Of articles curated just in this section, of which 107 articles were evaluated, 80% were from outlets on the left (18% Left, 63% Lean Left), 18% from Center-rated outlets, and 2% from outlets on the right (2% Right, 0% Lean Right).

### AllSides Media Bias Ratings™ of *Top Stories* Sources Curated on Bing News’ Homepage

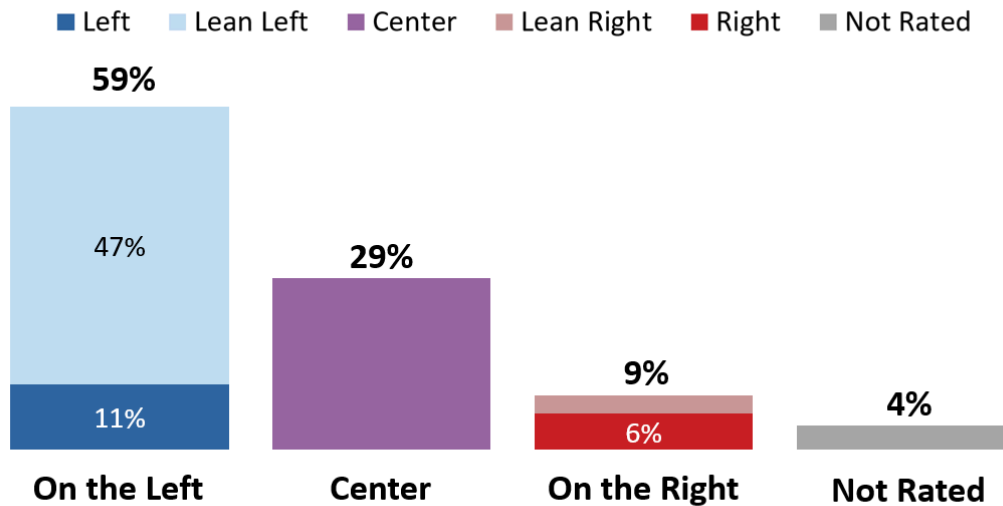

Percentage of articles, out of 107, attributed to a source and its rating based on AllSides Media Bias Ratings™. Content collected between September 9–21, 2025. See report for details.

## “U.S. News” Section

A total of 70 articles were evaluated in Bing News’ “U.S. News” section, where 59% were from outlets on the left (11% Left, 47% Lean Left), 35% from Center-rated outlets, and 9% from outlets on the right (6% Right, 3% Lean Right). Four percent of articles were from outlets not rated by AllSides.

## AllSides Media Bias Ratings™ of U.S. News Sources Curated on Bing News

Percentage of articles, out of 70, attributed to a source and its rating based on AllSides Media Bias Ratings™. Content collected between September 9–21, 2025. See report for details.

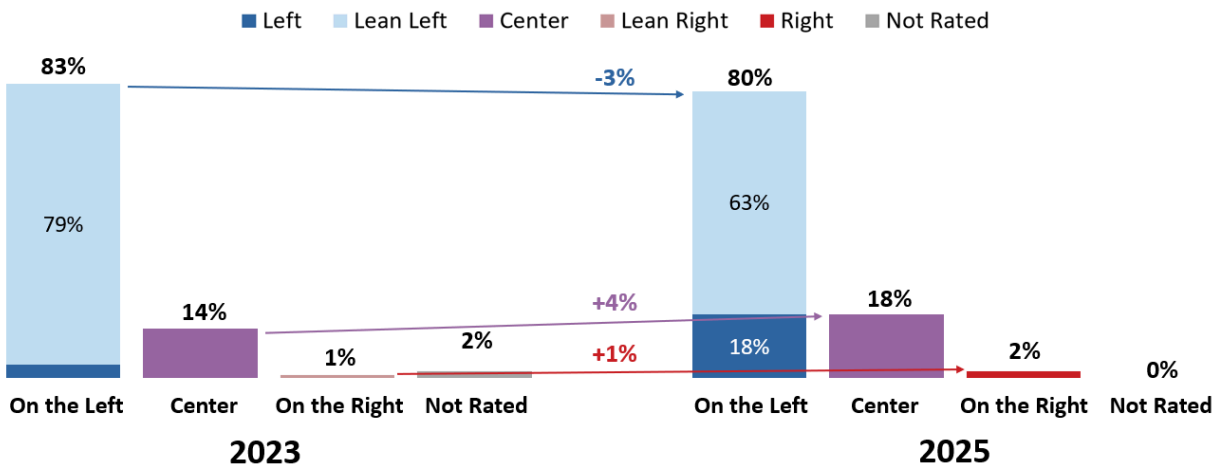

## “Top Stories” Section 2023 and 2025 Data Compared

AllSides conducted a [similar analysis of Bing News in 2023](#).

In the “Top Stories” section alone, the 2023 analysis found 83% of articles were from outlets on the left (4% Left, 79% Lean Left), 14% from Center-rated outlets, and 1% from outlets on the right (0% Right, 1% Lean Right). Two percent of articles were from outlets not rated by AllSides.

## AllSides Media Bias Ratings™ of Top Stories Curated on Bing News' Homepage, 2023 vs. 2025

Percentage of articles attributed to a source and its rating based on AllSides Media Bias Ratings™. Content collected between March 9–22, 2023 for the 2023 analysis, and September 9–21, 2025 for the 2025 analysis. See report for details.

Comparatively, the results were relatively stable from 2023 to 2025 for Bing News' "Top Stories" section. A 3% decline in outlets on the left, 4% gain in Center-rated outlets, and 1% gain in outlets on the right were observed.

### Rating Changes Over Time

Note that while the 2023 and 2025 analyses used similar methodologies, AllSides Media Bias Ratings change over time, which affect the comparison. Notably, The [Associated Press](#) was curated 14% of the time in 2025. It was categorized as Lean Left in 2023 and shifted to Left in 2024 following an updated AllSides rating, and is reflected as such in both charts above. AllSides has also expanded its ratings, so some sources may have moved from Not Rated to Left, Lean Left, Center, Lean Right, or Right.

### Background on Bing News

[Bing News](#) is a news aggregator owned and operated by Microsoft. It curates content from various news media outlets.

Bing News is powered by [MSN](#). Bing News displays a slightly different layout than MSN, which varies depending on platform visited. On its [homepage](#), it displays "Top stories" first, followed by "Trending on Bing," "Local news," "World," and a "U.S." section.

The "Trending on Bing" section allows users to view relevant news stories on trending topics, which are curated by Microsoft's AI. The "Local news" section displays news in a user's location

and generally from local and statewide news outlets (users can also change their results to another location in settings).

To distinguish analysis from opinion and other types of content, Bing News [labels](#) some articles curated on its site. These labels include but are not limited to: *Analysis, Backgrounder, Fact check, In depth, Live update, Opinion, and Satire.*

Bing News allows users to select news stories of interest to them, including Sports, Science, Technology, Entertainment, Politics, and Business.

As of the time of this analysis, Bing News displayed the same “Top stories” and “U.S.” content, regardless of users’ location in the U.S. Users can “Follow” different news sources when reading an article curated by Bing News, however, that feature only has an impact on the [Bing Search engine results](#).

There is also a search function in Bing News. Similar to other non-personalized content, results from the search are not personalized for the user, unless the user changes the time frame of stories searched and sorts stories by “Most recent” instead of the default “Best match.”

# About AllSides™

AllSides is the standard for information integrity. By revealing bias and providing perspectives from all sides, we help people better understand the world — and each other.

AllSides' information integrity technologies and services help people and organizations get out of manipulative, one-sided, and biased information systems wherever they might be — in technology, news, companies, government, classrooms and beyond — so we can all see the full picture, think for ourselves and make the best decisions.

AllSides serves news consumers at AllSides.com and provides patented technologies, tools and services to media companies, nonprofits, schools, businesses and other organizations at <https://www.allsides.com/tools-services>.

AllSides' balanced newsfeed provides news from the left, center, and right and is powered by over 2,400 [AllSides Media Bias Ratings™](#) that reveal the average judgment of Americans, not one elite group.

AllSides provides a platform for a diverse range of perspectives on current events and political issues. This includes presenting news and analysis from multiple viewpoints, including those that may not be represented in mainstream media. AllSides aims to foster greater understanding and dialogue by providing a space where people can learn about and engage with perspectives that differ from their own.

AllSides' mission is to help people better understand the world — and each other. AllSides [employs](#) a multipartisan team of editors who review and curate news articles from a variety of sources. The articles are then presented side-by-side in a balanced newsfeed that reveals the political perspective of the source.

Since 2012, AllSides has been analyzing the media bias of news outlets using its patented and proprietary systems, providing over 2,400 media bias ratings for news sources, writers, fact-check organizations, and think tanks. AllSides believes everyone is biased, and that's okay. But hidden bias can manipulate, mislead, and divide us.

AllSides provides Media Bias Audits to news companies interested in discovering their bias and providing more objective, balanced news. Its patented and proprietary system reveals how average Americans perceive the political bias of news reporting, and its multipartisan panel provides recommendations for achieving more balanced news.

In addition to providing news and analysis, AllSides also offers tools and resources for individuals, schools, and organizations interested in promoting media literacy and understanding. This includes the [AllSides Media Bias Chart™](#), [AllSides for Schools](#), [Red Blue Translator](#), and other [tools](#) and [services](#).

## About AllSides Media Bias Ratings™

AllSides empowers you to understand the role media bias plays in the news and information you consume. [AllSides Media Bias Ratings™](#) and the [AllSides Media Bias Chart™](#) help make news bias transparent, allowing you to easily identify different perspectives and political leanings so you can get the full picture and think for yourself.

**AllSides Media Bias Ratings™ reflect the average judgment of all Americans, not just a panel of insiders.** AllSides balances the input of experts and ordinary people across the political spectrum so that our bias ratings reveal the average judgment of all Americans, not one elite group. We use multi-partisan Editorial Reviews by trained experts and Blind Bias Surveys™ in which participants rate content without knowing the source.

AllSides believes there is no such thing as [unbiased news](#), and that concealed bias can mislead and divide us. The best approach is to acknowledge and balance this bias, so that people can consider multiple viewpoints and gain a more comprehensive understanding of the world around them.

AllSides assigns a rating of [Left](#), [Lean Left](#), [Center](#), [Lean Right](#), or [Right](#) to each media outlet or writer, as well as a numerical rating using the [AllSides Media Bias Meter™](#), which provides more nuance in each category.

The AllSides patented bias detection and display technology is powered by a combination of the ‘wisdom-of-the-crowd’ technology and statistical research and methodologies. The system utilizes multiple methods for calculating media bias, and combines them for the best results. For each source, the methodology may include:

- **Blind Bias Surveys** — A survey that asks respondents to rate the media bias of a news outlet on a left-right scale without knowing the news source or author they are reviewing. AllSides normalizes these data based on respondent ideology to ensure that the audience reflects the social and political diversity of the nation.
- **Editorial Reviews** — A multipartisan panel conducts in-depth reviews of a media outlet. The Editorial Review Panel includes people from across the political spectrum. During this process, each reviewer independently evaluates and suggests a rating for the source. Then, the group discusses individual findings, shares impressions, and comes to an agreement on the result.
- **Third Party Data** — When available and relevant, data that is conducted by a transparent, credible source may inform AllSides Media Bias Ratings™. AllSides always notes which third-party analyses it has taken to account on the source page for any outlet.
- **Community Feedback** — Visitors to AllSides.com can vote on the rating for any outlet. This feedback does not determine our ratings, but may trigger a deeper review.

- **Independent Reviews** — An AllSides reviewer assesses content and comes to a general conclusion on a source’s bias. This is AllSides’ lowest level of analysis, usually undertaken to give initial, low-confidence ratings.

For more information about how AllSides rated media bias, visit its [media bias rating methods page](#).
