# Overview

An AllSides analysis of [Google News](#) in November 2025 found that it displayed more sources with an AllSides Media Bias Rating™ on the left than the center or right.

Of 218 articles evaluated over a two-week period, **73% were from outlets on the left (12% Left, 61% Lean Left), 25% from Center-rated outlets, and 1% from outlets on the right (1% Right, 0% Lean Right).** One percent of articles evaluated were from outlets not rated by AllSides.

## AllSides Media Bias Ratings™ of Top News Sources Curated on Google News' Homepage

*Percentage of articles, out of 218, attributed to a source and its rating based on AllSides Media Bias Ratings™. Content collected between November 17–30, 2025 from “Top Stories,” “U.S.,” and “World” sections in Google News. See report for details.*

**Note:** Percentages are rounded to whole numbers; totals may not sum exactly due to rounding.

The analysis looked specifically at Google News’ “Top Stories,” “U.S.,” and “World” sections, which are not personalized for individual users.

The results of the November 2025 AllSides Google News Analysis were somewhat consistent with AllSides’ past analyses of the aggregator conducted in 2022, 2023, and 2024.

The analysis, conducted from November 17–30, 2025, cross-referenced articles curated on Google News with the [AllSides Media Bias Rating™](#) for each source. [AllSides Media Bias Ratings™](#) are determined by a methodology that reflects the average judgment of all Americans.

[New York Times News \(Lean Left bias\)](#), [CNN \(Lean Left bias\)](#), and [BBC News \(Center bias\)](#) were the most commonly curated sources.

Note that this analysis does not investigate whether the political leanings or biases displayed by Google News are intentional. Whether Google News should provide a broader or more balanced diversity of perspectives, and whether that would support or hinder a healthier democratic society, is a philosophical or ethical question beyond the bounds of this analysis, which is descriptive only.

# Purpose & Methodology

AllSides conducted this media bias analysis of Google News to determine the political bias of the aggregator based on the media outlets it curates.

## Content Collection

AllSides collected the top stories displayed on Google News over the course of a two-week period from November 17–30, 2025, during the 10:00am ET hour each day. This consisted of pulling from the “Top Stories,” “U.S.,” and “World” sections of the website’s homepage.

Because the respective sections are unaffected by algorithms or personalization, these were the three sections AllSides chose to analyze for this report and previous reports.

Note: Due to a content collection error on November 27, three articles each from the “U.S.” and “World” sections were not collected. This reduced the total articles analyzed from 224 to 218.

## How AllSides Made This Analysis as Objective as Possible

In an effort to be as objective as possible in the analysis, **AllSides only took the bias of the media outlet into account — not the content of the article itself.** For example, any article curated from The Wall Street Journal News was considered Center, reflecting the outlet’s overall AllSides Media Bias Rating at the time of the analysis. AllSides Media Bias Ratings reflect the average view of people across the political spectrum, not one individual or group. AllSides’ media bias rating methodology is based on Blind Bias Surveys of Americans across the political spectrum and expert panel reviews by a bipartisan group, preventing one elite group or individual from having a disproportionate impact on the ratings.

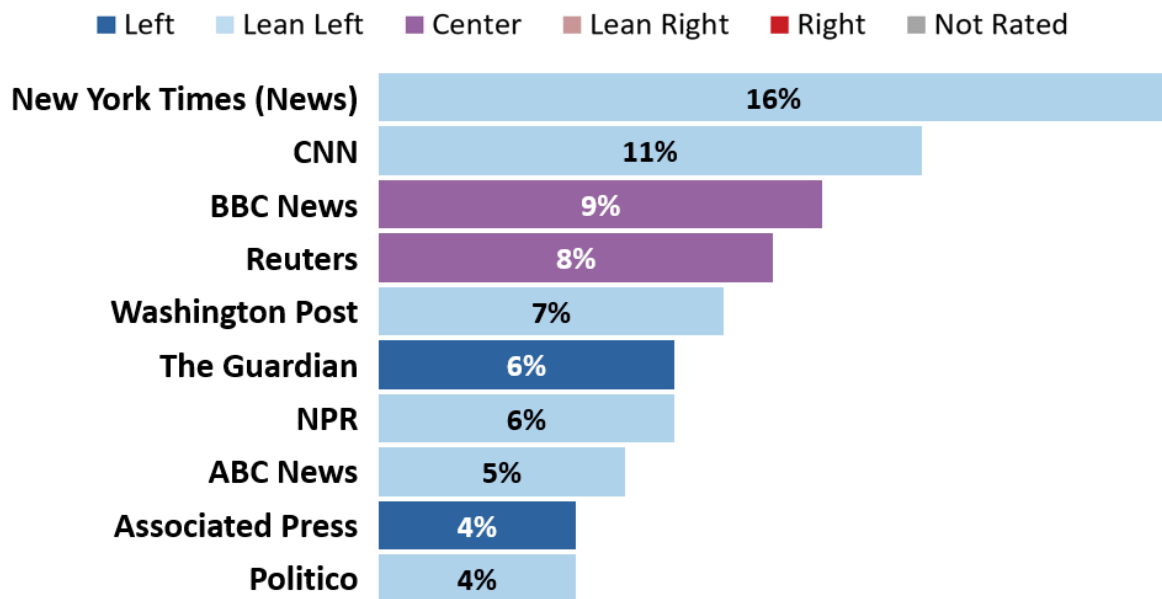

# In-Depth Findings

The AllSides analysis found that Google News more often curated news articles from outlets on the left than outlets on the right.

## Top Outlets Curated

Of the 218 total articles analyzed, the top five sources appearing the most often were [New York Times News \(Lean Left bias\)](#), [CNN \(Lean Left bias\)](#), [BBC News \(Center bias\)](#), [Reuters \(Center bias\)](#), and [Washington Post \(Lean Left bias\)](#).

## Top News Sources Curated on Google News' Homepage with Corresponding AllSides Media Bias Rating™

*Percentage of articles, out of 218, attributed to a source and its rating based on AllSides Media Bias Ratings™. Content collected between November 17–30, 2025 from “Top Stories,” “U.S.,” and “World” sections in Google News. See report for details.*

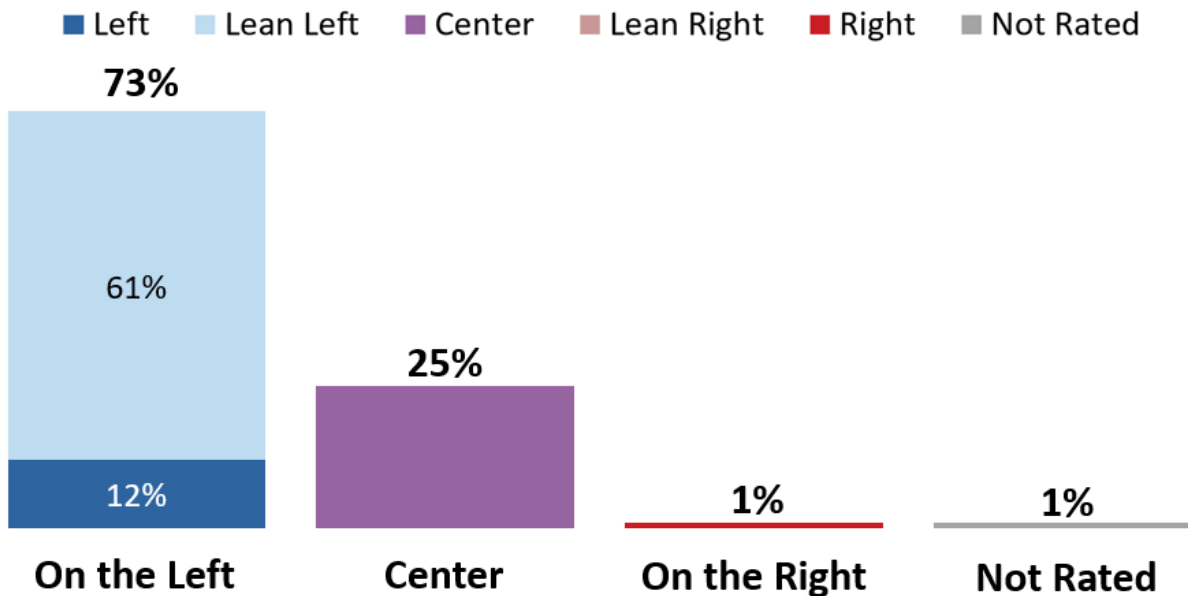

Of all outlets curated in the analysis — of which there were 32 — just [Fox News \(Right bias\)](#) was represented on the right.

## Bias of Outlets Curated

Of all 218 articles analyzed, 73% were from outlets on the left (12% Left, 61% Lean Left), 25% from Center-rated outlets, and 1% from outlets on the right (1% Right, 0% Lean Right). One percent of articles were from outlets not rated by AllSides.

### AllSides Media Bias Ratings™ of Top News Sources Curated on Google News' Homepage

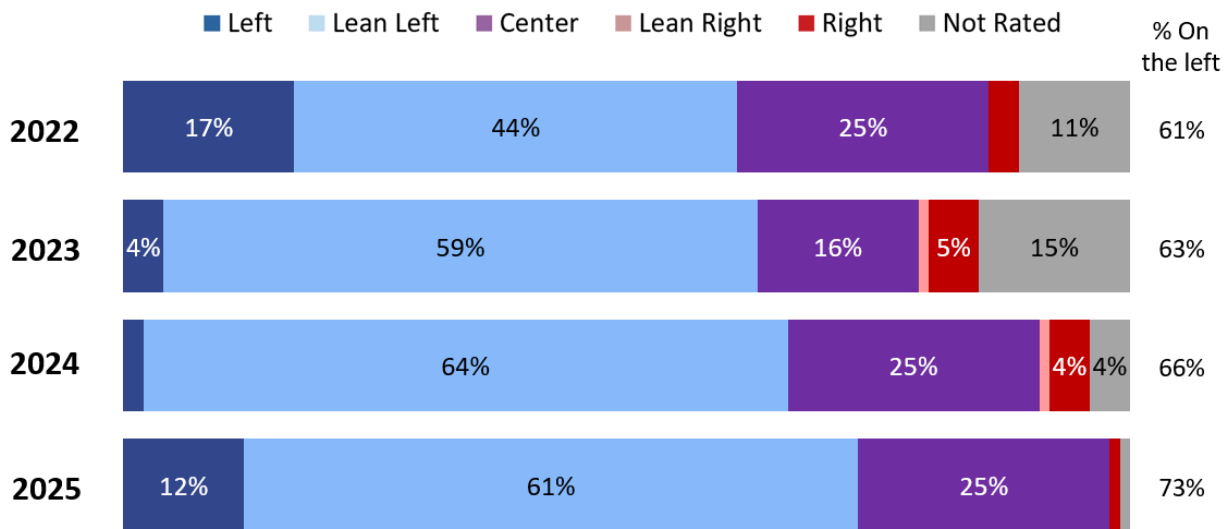

Percentage of articles, out of 218, attributed to a source and its rating based on AllSides Media Bias Ratings™. Content collected between November 17–30, 2025 from “Top Stories,” “U.S.,” and “World” sections in Google News. See report for details.

# 2022–2025 Data Compared

AllSides conducted a similar analysis of Google News in 2022, 2023, and 2024. The results of the November 2025 AllSides Google News Analysis were somewhat consistent with AllSides' past analyses.

## AllSides Media Bias Ratings™ of Sources Curated on Google News' Homepage, 2022-2025

Percentage of articles attributed to a source and its rating based on AllSides Media Bias Ratings™. Content collected in October and/or November of each respective year from "Top Stories," "U.S.," and "World" sections in Google News. See report for details.

Comparatively, the results were relatively stable from 2022 to 2025. An increase in the number of articles from outlets on the left was observed over time, in which they represented 61% of all articles in 2022, 63% in 2023, 66% in 2024, and 73% in 2025. Outlets on the right also dropped over time, with 3% of articles on the right in 2022, 6% in 2023, 5% in 2024, and only 1% in 2025.

## Rating Changes Over Time

Note that while the 2022–2025 analyses used the same methodologies, AllSides Media Bias Ratings change over time, which affect the comparison. Notably, [The Guardian](#) was curated 6% of the time in 2025. It was categorized as Lean Left in 2023 and shifted to Left in 2024 following an updated AllSides rating, and is reflected as such in the bar charts above. [The Associated Press](#) was similarly rated Lean Left in 2023 and shifted to Left in 2024 following AllSides Editorial Review. AllSides has also expanded its ratings, so some sources may have moved from Not Rated to Left, Lean Left, Center, Lean Right, or Right.

# Background on Google News

As of November 2025, the [AllSides Media Bias Rating for Google News](#) was [Lean Left](#), which means that the aggregator tends to favor perspectives from those on the left – in this case, liberal media outlets. This rating was based on multiple AllSides analyses of Google News since 2018, all of which found Lean Left bias.

The [2023 and 2022 AllSides bias analysis](#) of Google News found a Lean Left bias based on homepage sources and search term results.

The 2018 AllSides [research report](#) on Google News and Google News search results found the aggregator is biased toward left and left-leaning news sources.

The two audits conducted in 2019 assessed results from Google’s “Top Stories” section. One, a Northwestern University [audit](#), found that Google’s “Top Stories” section, which often appears at the very top of Google search results, favors just 20 media outlets, most rated Lean Left by AllSides. Another 2019 AllSides [audit](#) found Google’s “Top Stories” section heavily favored liberal news outlets when searching for terms related to two mass shootings.

According to the 2014 Pew Research Study, [Where News Audiences Fit on the Political Spectrum](#), 37% Google News readers held political values to the political left or left-of-center. 20% of Google News's audience was right or right-of-center, and roughly 43% of Google News' audience was considered mixed or center.

# About AllSides™

AllSides is the standard for information integrity. By revealing bias and providing perspectives from all sides, we help people better understand the world — and each other.

AllSides' information integrity technologies and services help people and organizations get out of manipulative, one-sided, and biased information systems wherever they might be — in technology, news, companies, government, classrooms and beyond — so we can all see the full picture, think for ourselves and make the best decisions.

AllSides serves news consumers at AllSides.com and provides patented technologies, tools and services to media companies, nonprofits, schools, businesses and other organizations at <https://www.allsides.com/tools-services>.

AllSides' balanced newsfeed provides news from the left, center, and right and is powered by over 2,400 [AllSides Media Bias Ratings™](#) that reveal the average judgment of Americans, not one elite group.

AllSides provides a platform for a diverse range of perspectives on current events and political issues. This includes presenting news and analysis from multiple viewpoints, including those that may not be represented in mainstream media. AllSides aims to foster greater understanding and dialogue by providing a space where people can learn about and engage with perspectives that differ from their own.

AllSides' mission is to help people better understand the world — and each other. AllSides [employs](#) a multipartisan team of editors who review and curate news articles from a variety of sources. The articles are then presented side-by-side in a balanced newsfeed that reveals the political perspective of the source.

Since 2012, AllSides has been analyzing the media bias of news outlets using its patented and proprietary systems, providing over 2,400 media bias ratings for news sources, writers, fact-check organizations, and think tanks. AllSides believes everyone is biased, and that's okay. But hidden bias can manipulate, mislead, and divide us.

AllSides provides Media Bias Audits to news companies interested in discovering their bias and providing more objective, balanced news. Its patented and proprietary system reveals how average Americans perceive the political bias of news reporting, and its multipartisan panel provides recommendations for achieving more balanced news.

In addition to providing news and analysis, AllSides also offers tools and resources for individuals, schools, and organizations interested in promoting media literacy and understanding. This includes the [AllSides Media Bias Chart™](#), [AllSides for Schools](#), [Red Blue Translator](#), and other [tools](#) and [services](#).

## About AllSides Media Bias Ratings™

AllSides empowers you to understand the role media bias plays in the news and information you consume. [AllSides Media Bias Ratings™](#) and the [AllSides Media Bias Chart™](#) help make news bias transparent, allowing you to easily identify different perspectives and political leanings so you can get the full picture and think for yourself.

**AllSides Media Bias Ratings™ reflect the average judgment of all Americans, not just a panel of insiders.** AllSides balances the input of experts and ordinary people across the political spectrum so that our bias ratings reveal the average judgment of all Americans, not one elite group. We use multi-partisan Editorial Reviews by trained experts and Blind Bias Surveys™ in which participants rate content without knowing the source.

AllSides believes there is no such thing as [unbiased news](#), and that concealed bias can mislead and divide us. The best approach is to acknowledge and balance this bias, so that people can consider multiple viewpoints and gain a more comprehensive understanding of the world around them.

AllSides assigns a rating of [Left](#), [Lean Left](#), [Center](#), [Lean Right](#), or [Right](#) to each media outlet or writer, as well as a numerical rating using the [AllSides Media Bias Meter™](#), which provides more nuance in each category.

The AllSides patented bias detection and display technology is powered by a combination of the ‘wisdom-of-the-crowd’ technology and statistical research and methodologies. The system utilizes multiple methods for calculating media bias, and combines them for the best results. For each source, the methodology may include:

- **Blind Bias Surveys** — A survey that asks respondents to rate the media bias of a news outlet on a left-right scale without knowing the news source or author they are reviewing. AllSides normalizes these data based on respondent ideology to ensure that the audience reflects the social and political diversity of the nation.
- **Editorial Reviews** — A multipartisan panel conducts in-depth reviews of a media outlet. The Editorial Review Panel includes people from across the political spectrum. During this process, each reviewer independently evaluates and suggests a rating for the source. Then, the group discusses individual findings, shares impressions, and comes to an agreement on the result.
- **Third Party Data** — When available and relevant, data that is conducted by a transparent, credible source may inform AllSides Media Bias Ratings™. AllSides always notes which third-party analyses it has taken to account on the source page for any outlet.
- **Community Feedback** — Visitors to AllSides.com can vote on the rating for any outlet. This feedback does not determine our ratings, but may trigger a deeper review.

- **Independent Reviews** — An AllSides reviewer assesses content and comes to a general conclusion on a source’s bias. This is AllSides’ lowest level of analysis, usually undertaken to give initial, low-confidence ratings.

For more information about how AllSides rated media bias, visit its [media bias rating methods page](#).
