Overview

An AllSides analysis of [NewsBreak](#) in December 2025 found that it displayed more sources with an AllSides Media Bias Rating™ on the left than the center or right.

Of 140 articles evaluated over a two-week period, **60% were from outlets on the left (0% Left, 60% Lean Left), 8% from Center-rated outlets, and 21% from outlets on the right (19% Right, 3% Lean Right)**. Eleven percent of articles evaluated were from outlets not rated by AllSides.

AllSides Media Bias Ratings™ of Sources Curated on NewsBreak National News

Percentage of articles, out of 140, attributed to a source and its rating based on AllSides Media Bias Ratings™. Content collected between December 8–21, 2025. See report for details.

Note: Percentages are rounded to whole numbers; totals may not sum exactly due to rounding.

The analysis looked specifically at NewsBreak’s National Headlines, which is located on its app and at newsbreak.com/headlines. NewsBreak [bills](#) itself as “the nation’s leading local news app” and its homepage shows local news. For the purposes of this analysis, AllSides looked only at non-customizable, non-local content in NewsBreak’s National Headlines section.

The December 2025 AllSides NewsBreak Analysis found that NewsBreak curated slightly more from outlets rated on the right, and less from outlets rated on the left, when compared to AllSides' [2023 analysis](#) of the aggregator.

The analysis, conducted from December 8–21, 2025, cross-referenced articles curated on NewsBreak with the [AllSides Media Bias Rating™](#) for each source. [AllSides Media Bias Ratings™](#) are determined by a methodology that reflects the average judgment of all Americans.

[NBC News \(Lean Left bias\)](#), [Fox News \(Right bias\)](#), and [CBS News \(Lean Left bias\)](#) were the most commonly curated sources.

Note that this analysis does not investigate whether the political leanings or biases displayed by NewsBreak are intentional. Whether NewsBreak should provide a broader or more balanced diversity of perspectives, and whether that would support or hinder a healthier democratic society, is a philosophical or ethical question beyond the bounds of this analysis, which is descriptive only.

Purpose & Methodology

AllSides conducted this media bias analysis of NewsBreak to determine the political bias of the aggregator based on the media outlets it curates.

Content Collection

AllSides collected the top headlines displayed on NewsBreak's National News section over the course of a two-week period from December 8–21, 2025, during the 10:00am ET hour each day.

While the news source primarily focuses on local content, it does highlight national headlines as well, which are curated and not user-customizable. Users can block an entire news source, which would prevent it from appearing on Newsbreak at all. For the purposes of this analysis, AllSides only looked at national news headlines without customizing the experience.

How AllSides Made This Analysis as Objective as Possible

In an effort to be as objective as possible in the analysis, **AllSides only took the bias of the media outlet into account — not the content of the article itself**. For example, any article curated from The Wall Street Journal News was considered Center, reflecting the outlet's overall AllSides Media Bias Rating at the time of the analysis. AllSides Media Bias Ratings reflect the average view of people across the political spectrum, not one individual or group. AllSides' media bias rating methodology is based on Blind Bias Surveys of Americans across the political spectrum and expert panel reviews by a bipartisan group, preventing one elite group or individual from having a disproportionate impact on the ratings.

In-Depth Findings

The AllSides analysis found that NewsBreak more often curated news articles from outlets on the left than outlets on the right.

Top Outlets Curated

Of the 140 total articles analyzed, the top five sources appearing the most often were [NBC News \(Lean Left bias\)](#), [Fox News \(Right bias\)](#), [CBS News \(Lean Left bias\)](#), [ABC News \(Lean Left bias\)](#), and [United Press International \(Center bias\)](#).

Top News Sources Curated on NewsBreak National News with Corresponding AllSides Media Bias Rating™

Percentage of articles, out of 140, attributed to a source and its rating based on AllSides Media Bias Ratings™. Content collected between December 8–21, 2025. See report for details.

Of all outlets curated in the analysis — of which there were 22 — two were from the right: [Fox News \(Right bias\)](#) and [Fox Business \(Lean Right bias\)](#).

Bias of Outlets Curated

Of all 140 articles analyzed, 60% were from outlets on the left (0% Left, 60% Lean Left), 8% from Center-rated outlets, and 21% from outlets on the right (19% Right, 3% Lean Right). Eleven percent of articles were from outlets not rated by AllSides.

AllSides Media Bias Ratings™ of Sources Curated on NewsBreak National News

Percentage of articles, out of 140, attributed to a source and its rating based on AllSides Media Bias Ratings™. Content collected between December 8–21, 2025. See report for details.

2023 and 2025 Data Compared

AllSides conducted a [similar analysis of NewsBreak in 2023](#) of 210 articles curated by the aggregator.

The 2023 analysis found 80% of articles were from outlets on the left (0% Left, 80% Lean Left), 10% from Center-rated outlets, and 8% from outlets on the right (8% Right, 0% Lean Right). Two percent of articles were from outlets not rated by AllSides.

AllSides Media Bias Ratings™ of Sources Curated on NewsBreak National News, 2023 vs. 2025

Percentage of articles attributed to a source and its rating based on AllSides Media Bias Ratings™. Content collected between September 7–27, 2023 for the 2023 analysis, and December 8–21, 2025 for the 2025 analysis. See report for details.

Comparatively, the results shifted from 2023 to 2025. A 20% decline in outlets on the left, 2% decline in Center-rated outlets, and 13% gain in outlets on the right were observed.

Rating Changes Over Time

Note that while the 2023 and 2025 analyses used the same methodologies, AllSides Media Bias Ratings change over time, which affect the comparison. AllSides has also expanded its ratings, so some sources may have moved from Not Rated to Left, Lean Left, Center, Lean Right, or Right.

Background on NewsBreak

NewsBreak is largely known for its mobile application, which allows users to view local news. It is also available on desktop (via its [website](#)), tablets, and has a daily newsletter.

The news source aligns itself with six principles: accuracy, transparency, accountability, safety, and fairness. On its [Community Standards page](#), it describes its commitment to fairness: “NewsBreak believes in highlighting diverse voices, stories, opinions, and sources. We favor work that presents all relevant sides of a story and provides all necessary context. It is equally important that our contributors and partners do not draw false moral equivalencies where none exist... Excessive bias that distorts or misrepresents is not allowed.”

NewsBreak aggregates a wide variety of topics, including politics, sports, technology, weather, local traffic, and much more. Users can save topics they’re most interested in and articles they want to read later.

The company was founded in 2015, and is highly customizable by users. The [About page](#) reads, “Newsbreak’s cutting-edge personalization technology responds to your choices and reading habits in the app and tails itself to suit your tastes.”

About AllSides™

AllSides is the standard for information integrity. By revealing bias and providing perspectives from all sides, we help people better understand the world — and each other.

AllSides' information integrity technologies and services help people and organizations get out of manipulative, one-sided, and biased information systems wherever they might be — in technology, news, companies, government, classrooms and beyond — so we can all see the full picture, think for ourselves and make the best decisions.

AllSides serves news consumers at AllSides.com and provides patented technologies, tools and services to media companies, nonprofits, schools, businesses and other organizations at <https://www.allsides.com/tools-services>.

AllSides' balanced newsfeed provides news from the left, center, and right and is powered by over 2,400 [AllSides Media Bias Ratings™](#) that reveal the average judgment of Americans, not one elite group.

AllSides provides a platform for a diverse range of perspectives on current events and political issues. This includes presenting news and analysis from multiple viewpoints, including those that may not be represented in mainstream media. AllSides aims to foster greater understanding and dialogue by providing a space where people can learn about and engage with perspectives that differ from their own.

AllSides' mission is to help people better understand the world — and each other. AllSides [employs](#) a multipartisan team of editors who review and curate news articles from a variety of sources. The articles are then presented side-by-side in a balanced newsfeed that reveals the political perspective of the source.

Since 2012, AllSides has been analyzing the media bias of news outlets using its patented and proprietary systems, providing over 2,400 media bias ratings for news sources, writers, fact-check organizations, and think tanks. AllSides believes everyone is biased, and that's okay. But hidden bias can manipulate, mislead, and divide us.

AllSides provides Media Bias Audits to news companies interested in discovering their bias and providing more objective, balanced news. Its patented and proprietary system reveals how average Americans perceive the political bias of news reporting, and its multipartisan panel provides recommendations for achieving more balanced news.

In addition to providing news and analysis, AllSides also offers tools and resources for individuals, schools, and organizations interested in promoting media literacy and understanding. This includes the [AllSides Media Bias Chart™](#), [AllSides for Schools](#), [Red Blue Translator](#), and other [tools](#) and [services](#).

About AllSides Media Bias Ratings™

AllSides empowers you to understand the role media bias plays in the news and information you consume. [AllSides Media Bias Ratings™](#) and the [AllSides Media Bias Chart™](#) help make news bias transparent, allowing you to easily identify different perspectives and political leanings so you can get the full picture and think for yourself.

AllSides Media Bias Ratings™ reflect the average judgment of all Americans, not just a panel of insiders. AllSides balances the input of experts and ordinary people across the political spectrum so that our bias ratings reveal the average judgment of all Americans, not one elite group. We use multi-partisan Editorial Reviews by trained experts and Blind Bias Surveys™ in which participants rate content without knowing the source.

AllSides believes there is no such thing as [unbiased news](#), and that concealed bias can mislead and divide us. The best approach is to acknowledge and balance this bias, so that people can consider multiple viewpoints and gain a more comprehensive understanding of the world around them.

AllSides assigns a rating of [Left](#), [Lean Left](#), [Center](#), [Lean Right](#), or [Right](#) to each media outlet or writer, as well as a numerical rating using the [AllSides Media Bias Meter™](#), which provides more nuance in each category.

The AllSides patented bias detection and display technology is powered by a combination of the ‘wisdom-of-the-crowd’ technology and statistical research and methodologies. The system utilizes multiple methods for calculating media bias, and combines them for the best results. For each source, the methodology may include:

- **Blind Bias Surveys** — A survey that asks respondents to rate the media bias of a news outlet on a left-right scale without knowing the news source or author they are reviewing. AllSides normalizes these data based on respondent ideology to ensure that the audience reflects the social and political diversity of the nation.
- **Editorial Reviews** — A multipartisan panel conducts in-depth reviews of a media outlet. The Editorial Review Panel includes people from across the political spectrum. During this process, each reviewer independently evaluates and suggests a rating for the source. Then, the group discusses individual findings, shares impressions, and comes to an agreement on the result.
- **Third Party Data** — When available and relevant, data that is conducted by a transparent, credible source may inform AllSides Media Bias Ratings™. AllSides always notes which third-party analyses it has taken to account on the source page for any outlet.
- **Community Feedback** — Visitors to AllSides.com can vote on the rating for any outlet. This feedback does not determine our ratings, but may trigger a deeper review.

- **Independent Reviews** — An AllSides reviewer assesses content and comes to a general conclusion on a source's bias. This is AllSides' lowest level of analysis, usually undertaken to give initial, low-confidence ratings.

For more information about how AllSides rated media bias, visit its [media bias rating methods page](#).
