# Overview

An AllSides analysis of [SmartNews](#) in December 2025 found that it displayed more sources with an AllSides Media Bias Rating™ on the left and Center than the right.

Of 280 articles evaluated over a two-week period, **29% were from outlets on the left (7% Left, 22% Lean Left), 34% from Center-rated outlets, and 8% from outlets on the right (2% Right, 5% Lean Right)**. Thirty percent of articles evaluated were from outlets not rated by AllSides.

## AllSides Media Bias Ratings™ of News Sources Curated on SmartNews

Percentage of articles, out of 280, attributed to a source and its rating based on AllSides Media Bias Ratings™. Content collected between December 8–21, 2025. See report for details.

**Note:** Percentages are rounded to whole numbers; totals may not sum exactly due to rounding.

The analysis looked specifically at four sections on SmartNews: “Top news,” “U.S.,” “World,” and “Politics.” A similar analysis in 2023 also looked at a “SmartTake” section, which was [discontinued](#) and thus not included in the 2025 analysis.

The analysis, conducted from December 8–21, 2025, cross-referenced articles curated on SmartNews with the [AllSides Media Bias Rating™](#) for each source. [AllSides Media Bias](#)

[Ratings™](#) are determined by a methodology that reflects the average judgment of all Americans.

[The Hill \(Center bias\)](#), [Reuters \(Center bias\)](#), and [ABC News \(Lean Left bias\)](#) were the most commonly curated sources.

Note that this analysis does not investigate whether the political leanings or biases displayed by SmartNews are intentional. Whether SmartNews should provide a broader or more balanced diversity of perspectives, and whether that would support or hinder a healthier democratic society, is a philosophical or ethical question beyond the bounds of this analysis, which is descriptive only.

# Purpose & Methodology

AllSides conducted this media bias analysis of SmartNews to determine the political bias of the aggregator based on the media outlets it curates.

## Content Collection

AllSides collected the top stories displayed on SmartNews over the course of a two-week period from December 8–21, 2025, during the 10:00am ET hour each day. This consisted of pulling from four sections on the SmartNews application: “Top news,” “U.S.,” “World,” and “Politics.”

Because these sections are largely consistent across users and less affected by personalization algorithms, AllSides selected them for analysis in this report.

## How AllSides Made This Analysis as Objective as Possible

In an effort to be as objective as possible in the analysis, **AllSides only took the bias of the media outlet into account — not the content of the article itself.** For example, any article curated from The Wall Street Journal News was considered Center, reflecting the outlet’s overall AllSides Media Bias Rating at the time of the analysis. AllSides Media Bias Ratings reflect the average view of people across the political spectrum, not one individual or group. AllSides’ media bias rating methodology is based on Blind Bias Surveys of Americans across the political spectrum and expert panel reviews by a multipartisan group, preventing one elite group or individual from having a disproportionate impact on the ratings.

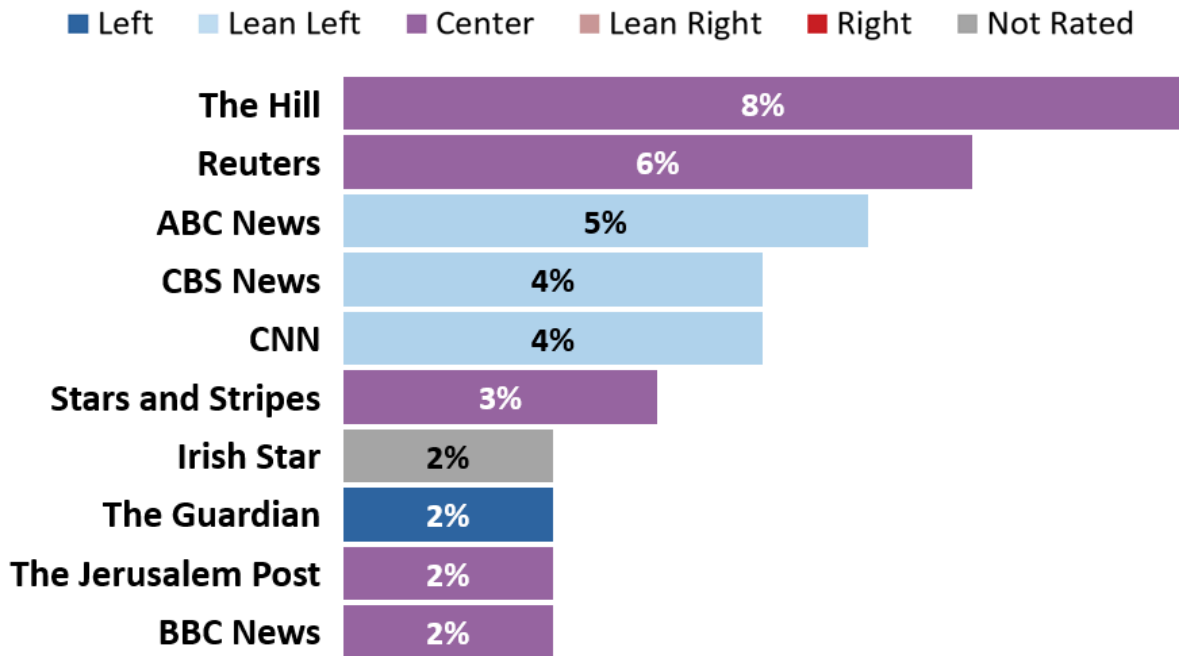

# In-Depth Findings

The AllSides analysis found that SmartNews more often curated news articles from outlets on the left and Center than outlets on the right.

## Top Outlets Curated

Of the 280 total articles analyzed, the top five sources appearing the most often were [The Hill \(Center bias\)](#), [Reuters \(Center bias\)](#), [ABC News \(Lean Left bias\)](#), [CBS News \(Lean Left bias\)](#), and [CNN \(Lean Left bias\)](#).

### News Sources Curated on SmartNews with Corresponding AllSides Media Bias Rating™

*Percentage of articles, out of 280, attributed to a source and its rating based on AllSides Media Bias Ratings™. Content collected between December 8–21, 2025. See report for details.*

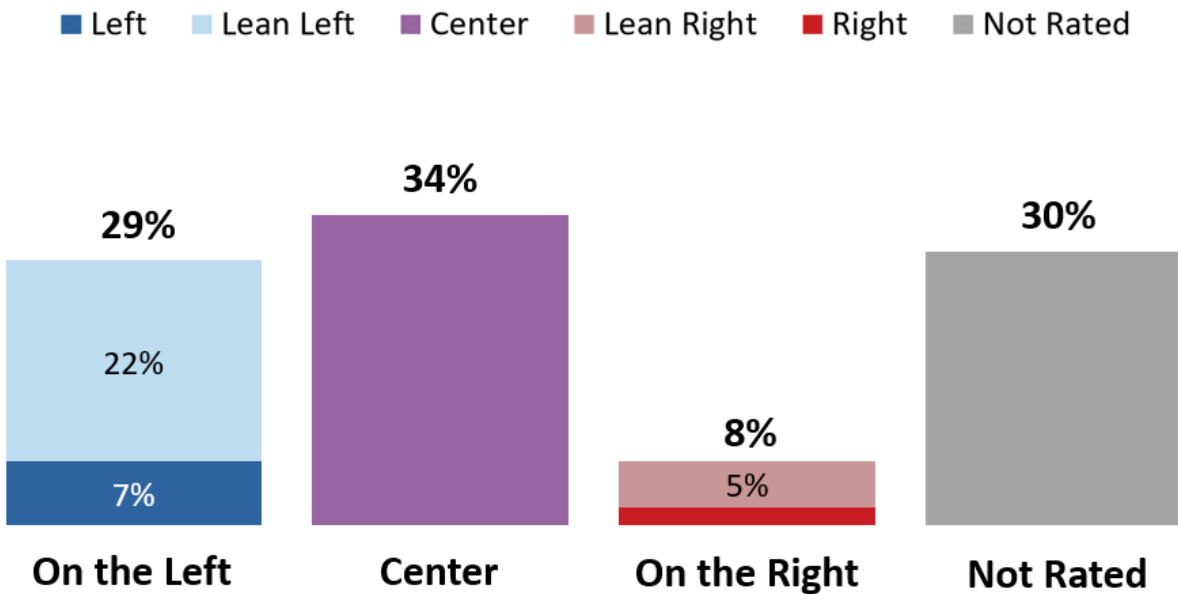

Of all outlets curated in the analysis — of which there were 120 — 28 were from the left, 30 were Center-biased, and 10 were from the right. The rest were not rated.

## Bias of Outlets Curated

Of all 280 articles analyzed, 29% were from outlets on the left (7% Left, 22% Lean Left), 34% from Center-rated outlets, and 8% from outlets on the right (2% Right, 5% Lean Right). Thirty percent of articles were from outlets not rated by AllSides.

### AllSides Media Bias Ratings™ of News Sources Curated on SmartNews

Percentage of articles, out of 280, attributed to a source and its rating based on AllSides Media Bias Ratings™. Content collected between December 8–21, 2025. See report for details.

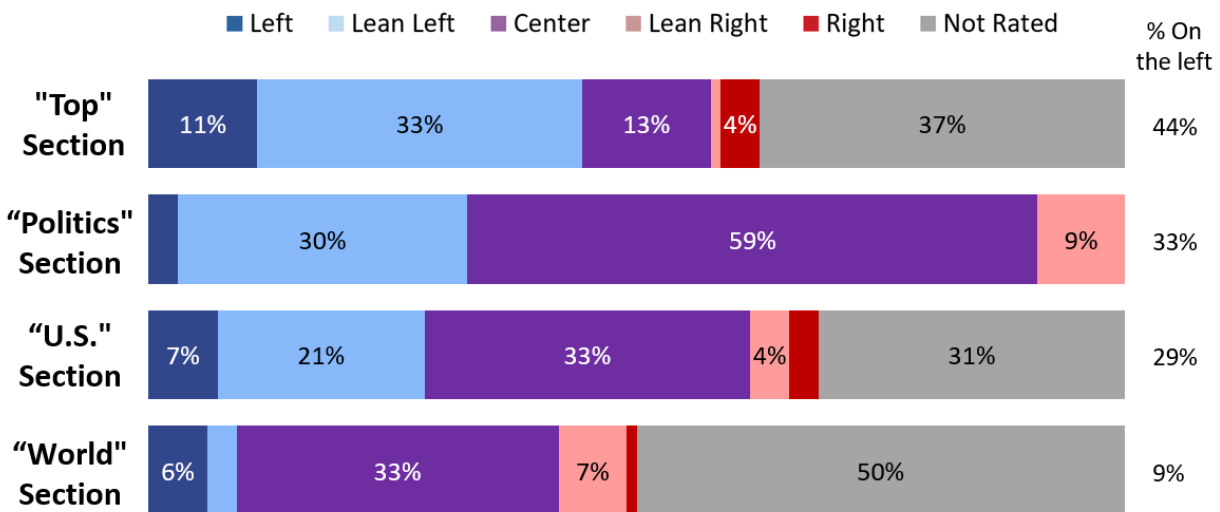

## Bias by SmartNews Section Evaluated

AllSides' analysis looked at four sections of the SmartNews application: "Top news," "U.S.," "World," and "Politics." A total of 70 articles per section were collected.

A breakdown of bias by section is as follows (ranked by percent on the left):

- "Top news" section: 44% on the left, 13% Center, 6% on the right
- "Politics" section: 33% on the left, 59% Center, 9% on the right
- "U.S." section: 29% on the left, 33% Center, 7% on the right
- "World" section: 9% on the left, 33% Center, 9% on the right

### AllSides Media Bias Ratings™ of News Sources Curated on SmartNews, by In-App Section

Percentage of articles, out of 70 for each section, attributed to a source and its rating based on AllSides Media Bias Ratings™. Content collected between December 8–21, 2025. Ranked by % on the left. See report for details.

# Background on SmartNews

[SmartNews](#) is a mobile application available in the [App Store](#) and [Google Play store](#) that aggregates news sources into a feed for users. The company was established in 2012 in Japan, and became available in the United States in 2014.

SmartNews has a tabbed interface, which allows users to quickly swipe between various topics, such as Sports, Tech, Entertainment, World, and more.

## “News From All Sides” Feature

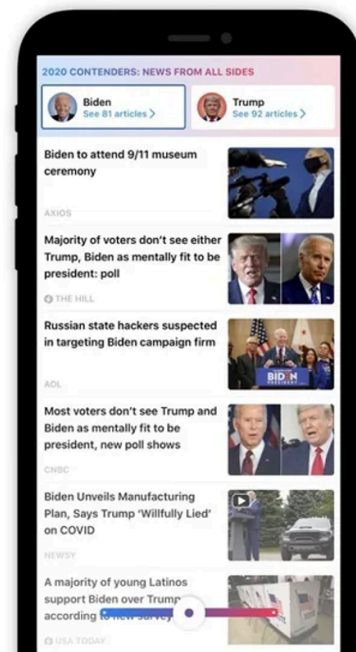

Under the Politics tab of SmartNews, there is a feature called “News From All Sides” (*Important Note: this feature is not connected in any way with AllSides Technologies, Inc. – the creator of this report*).

“News From All Sides” allows users to see articles about a specific topic or news story sorted in three groups, from liberal to conservative. The user can then slide between the different sources. As TechCrunch [described](#) the feature, it “aims to provide more transparency about news algorithms, which have been blamed for exacerbating political polarization.”

In the SmartNews application, it describes the feature: “As you slide from left to right, our algorithm will serve up a mix of stories with different perspectives.”

At the time of this report, it is unclear to AllSides how the algorithm works or how outlets are selected to appear in the left, center, or right sections of the feature.

For the purposes of this report, the “News From All Sides” feature of SmartNews was not included.

# About AllSides™

AllSides is the standard for information integrity. By revealing bias and providing perspectives from all sides, we help people better understand the world — and each other.

AllSides' information integrity technologies and services help people and organizations get out of manipulative, one-sided, and biased information systems wherever they might be — in technology, news, companies, government, classrooms and beyond — so we can all see the full picture, think for ourselves and make the best decisions.

AllSides serves news consumers at AllSides.com and provides patented technologies, tools and services to media companies, nonprofits, schools, businesses and other organizations at <https://www.allsides.com/tools-services>.

AllSides' balanced newsfeed provides news from the left, center, and right and is powered by over 2,400 [AllSides Media Bias Ratings™](#) that reveal the average judgment of Americans, not one elite group.

AllSides provides a platform for a diverse range of perspectives on current events and political issues. This includes presenting news and analysis from multiple viewpoints, including those that may not be represented in mainstream media. AllSides aims to foster greater understanding and dialogue by providing a space where people can learn about and engage with perspectives that differ from their own.

AllSides' mission is to help people better understand the world — and each other. AllSides [employs](#) a multipartisan team of editors who review and curate news articles from a variety of sources. The articles are then presented side-by-side in a balanced newsfeed that reveals the political perspective of the source.

Since 2012, AllSides has been analyzing the media bias of news outlets using its patented and proprietary systems, providing over 2,400 media bias ratings for news sources, writers, fact-check organizations, and think tanks. AllSides believes everyone is biased, and that's okay. But hidden bias can manipulate, mislead, and divide us.

AllSides provides Media Bias Audits to news companies interested in discovering their bias and providing more objective, balanced news. Its patented and proprietary system reveals how average Americans perceive the political bias of news reporting, and its multipartisan panel provides recommendations for achieving more balanced news.

In addition to providing news and analysis, AllSides also offers tools and resources for individuals, schools, and organizations interested in promoting media literacy and understanding. This includes the [AllSides Media Bias Chart™](#), [AllSides for Schools](#), [Red Blue Translator](#), and other [tools](#) and [services](#).

## About AllSides Media Bias Ratings™

AllSides empowers you to understand the role media bias plays in the news and information you consume. [AllSides Media Bias Ratings™](#) and the [AllSides Media Bias Chart™](#) help make news bias transparent, allowing you to easily identify different perspectives and political leanings so you can get the full picture and think for yourself.

**AllSides Media Bias Ratings™ reflect the average judgment of all Americans, not just a panel of insiders.** AllSides balances the input of experts and ordinary people across the political spectrum so that our bias ratings reveal the average judgment of all Americans, not one elite group. We use multi-partisan Editorial Reviews by trained experts and Blind Bias Surveys™ in which participants rate content without knowing the source.

AllSides believes there is no such thing as [unbiased news](#), and that concealed bias can mislead and divide us. The best approach is to acknowledge and balance this bias, so that people can consider multiple viewpoints and gain a more comprehensive understanding of the world around them.

AllSides assigns a rating of [Left](#), [Lean Left](#), [Center](#), [Lean Right](#), or [Right](#) to each media outlet or writer, as well as a numerical rating using the [AllSides Media Bias Meter™](#), which provides more nuance in each category.

The AllSides patented bias detection and display technology is powered by a combination of the ‘wisdom-of-the-crowd’ technology and statistical research and methodologies. The system utilizes multiple methods for calculating media bias, and combines them for the best results. For each source, the methodology may include:

- **Blind Bias Surveys** — A survey that asks respondents to rate the media bias of a news outlet on a left-right scale without knowing the news source or author they are reviewing. AllSides normalizes these data based on respondent ideology to ensure that the audience reflects the social and political diversity of the nation.
- **Editorial Reviews** — A multipartisan panel conducts in-depth reviews of a media outlet. The Editorial Review Panel includes people from across the political spectrum. During this process, each reviewer independently evaluates and suggests a rating for the source. Then, the group discusses individual findings, shares impressions, and comes to an agreement on the result.
- **Third Party Data** — When available and relevant, data that is conducted by a transparent, credible source may inform AllSides Media Bias Ratings™. AllSides always notes which third-party analyses it has taken to account on the source page for any outlet.
- **Community Feedback** — Visitors to AllSides.com can vote on the rating for any outlet. This feedback does not determine our ratings, but may trigger a deeper review.

- **Independent Reviews** — An AllSides reviewer assesses content and comes to a general conclusion on a source's bias. This is AllSides' lowest level of analysis, usually undertaken to give initial, low-confidence ratings.

For more information about how AllSides rated media bias, visit its [media bias rating methods page](#).
